Information Pamphlet Technology Aides

Technological Gadgets that may aid you during a storm

The Sanibel Police Department has researched existing technological tools that could assist you during a natural disaster. These technology tools can be found locally for purchase or ordered from the companies mentioned below.

Eton AM/FM/TV/Weather Band Radio with Wireless Phone Charger

The FR300 provides you with radio, light and cell phone battery life when you need it most. Just 90 seconds of cranking provides up to an hour of radio play. The hand-crank power generator charges the internal rechargeable Ni-MH battery pack. With the NOAA weather channels and TV VHF channels, you can find weather forecasts or listen to TV shows.

Solar Cell Phone Battery Chargers

Solar cellular batteries for Motorola, Nokia and Samsung wireless phones. Up to double the talk time and triple the standby on the same size battery. The Sun Power charges at home or in the car but also charges by sunlight. The battery will charge enough in fifteen minutes to make an emergency phone call or will charge completely in 4-5 hrs.

Rabbit Crank Master - Dynamo Cell Phone Generator

The hand crank cell phone charger will charge your cell phone even when there is no outlet available. Two minutes of cranking can power up to six minutes of talk time - which makes it more powerful than a plug in charger!

SideWinder Emergency Cell Phone Charger

The Sidewinder charger is the world's smallest, lightest, and most powerful portable cell phone charger available. It weighs only 2 ½ ounces and puts out power greater than a plug-in charger. The Side Winder Fits easily in a briefcase, suit pocket, purse, vehicle glove box or backpack. Two (2) minutes of charging equals over 6 minutes of talk time, even more standby time. The Sidewinder charger includes a Nokia cable and 4 adaptor tips to fit the most popular phone models.
